Three good reasons why our customers trust in us

Every partner is a big deal to us

In addition to our wide range of irrigation products, NORMA Group offers you personalized attention and professional business support.

A partner at your side

Small and medium-sized distributors will enjoy big support from NORMA. We recognize that our success is built on yours, so we commit to giving you the highest levels of product access, personalized sales attention, and marketing support.

We respond to your needs

Innovation often begins with distributor input. When our Eastern colleagues needed 17 mm dripline products, we responded with appropriately sized fittings and pipes. As a result, we can grow together in a dynamic marketplace.

Setting new standards

Where we find product gaps, NORMA Group creates new solutions for durability, flexibility, and efficiency that help our distributors increase their value and expand their business.

SmartConnect Solutions for all irrigation systems

An irrigation system is only as good as its connecting parts. So why not build the best system you can by relying on tried and tested joining and fitting solutions? Nowadays, every drop of water counts. Joining and fastening elements are usually the weakest link in an irrigation system, and we make sure your water flows smoothly to where it is ultimately needed, your plants.

Don't let your connections be your weakest link.

Discover our leading joining and fixing technology that connects your irrigation system just perfectly. We can provide you with the ideal solution that helps you put an end to inefficient water loss and meets all your irrigation needs. Uncompromising quality and reliability have made NORMA® the preferred brand for landscape and agricultural applications, structural and civil engineering, and sanitary solutions.

Benefit from an unrivalled portfolio, "Fit and Forget" installation, and let your water flow without having to worry about it any longer.

Compound expertise

NORMA and NDS, an irrigation leader with 45 years of water management experience, apply their combined intelligence to traditional irrigation and drip irrigation challenges. Thanks to their research and experience, NORMA Group offers leak-proof connectivity, faster and easier installation, and material construction that resists the destructive impacts of heat, cold, UV rays and more.

The management system complies with the requirements of the standards:
UNE-EN ISO 9001:2015, EN ISO 14001:2015 and ISO 45001:2018.

01 Irrigation Joining Solutions

NORMA Group, the world's leading manufacturer of connecting solutions, now offers high-quality joining solutions to meet irrigation needs.

They are suitable for both landscape and agriculture based irrigation. The product offering includes compression fittings, ball valves, and several other joining solutions.

Categories & Key Products

Compression Fittings NEW RANGE

High-performance compression fittings

- Complete range, certified for drinking water
- Suitable for highly demanding applications
- High UV and temperature resistance
- Fast and easy connection

[Page 08](#)

Ball Valves

High-quality nylon based ball valves

- Full flow design
- High UV resistance
- Higher resistance to mechanical impacts
- Available in blue and purple handle variants

[Page 38](#)

Threaded Fittings

One of the largest ranges in the market

- PN16 rated products
- Durable nylon based high-quality fittings
- Strong sealing effect
- Suitable for harsh weather conditions

[Page 41](#)

Clamp Saddles & Swing Pipe and Fittings NEW RANGE

Ideal solution for branching from existing pipelines

- Two clamp saddles ranges to meet all irrigation applications
- High-quality products
- Used for landscape irrigation needs
- Complete branching solution for sprays and rotors installations

[Page 46](#)

Clamps for Water Solutions

A core category in which NORMA has a reputation for excellence

- Multipurpose clamps: hose connections, hydrants, water filtration and more
- Durable installation in record time
- High resistance against rusting
- Easy installation

NEW RANGE
QuickTight
Technology

**Speed up your water pipe installations
with QuickTight Technology!**

- Certified for drinking water
- Push fit installation in all sizes
- Faster and easier installation
- Lip-gasket technology for superior performance
- Superior leak proof connections
- Durable materials, UV resistant

Technical Information

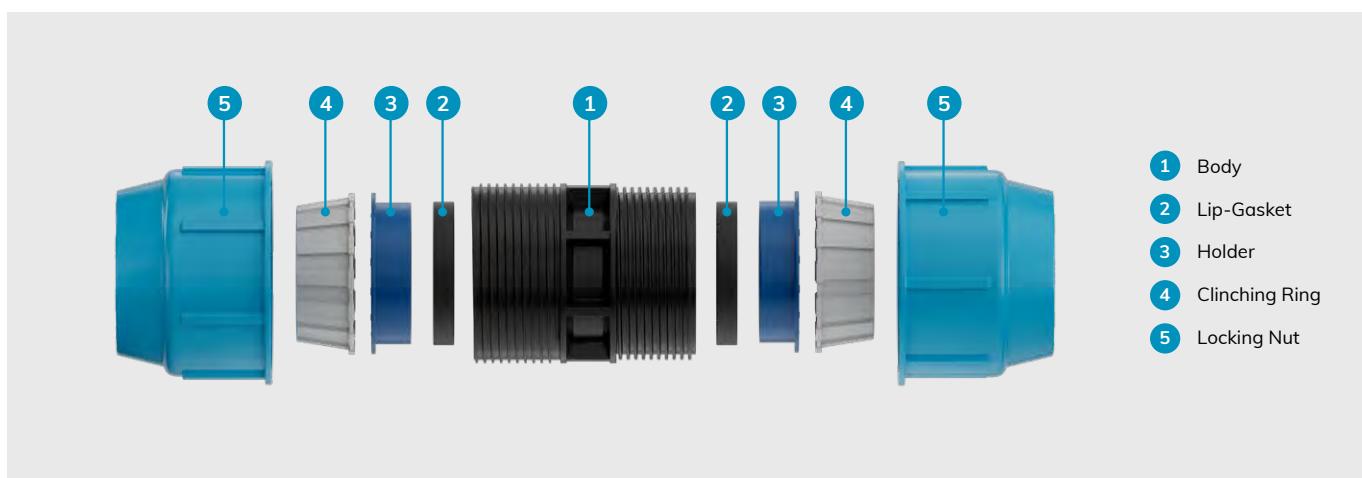

Applications

Ideally suited for connecting high- and low-density polyethylene tubing. These products are certified as compliant with international sanitary regulations for transport of drinking water according to DVGW, KIWA, ACS, WRAS and more.

Material

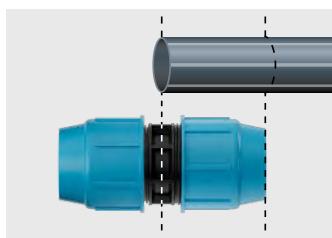

Nut	Polypropylene
Bodies	Polypropylene
Clinching Ring	POM (Acetal)
Lip-Gasket	NBR

Installation Tips

- 01** Unscrew the nut one or two turns or to the last thread.

- 02** Cut the pipe and deburr if necessary. Mark the insertion depth.

- 03** Push the pipe to the mark or the stop-end.

- 04** Screw the nut on tight. The nut can be tightened manually or using a hook tool.

NORMA MARLIN® Compression Fittings

are made in factories certified under ISO 9001:2018
according to UNI 9561-AS/NZS 4129-BRL-K17105 – DIN 8076 – ISO17885,
threads: UNI EN 10226-1 (ISO 7/1)

Female threads

ISO 7/1 Parallel

Male threads tapered 1:16

ISO 7/1 Conical

NORMA PN 16

High-performance compression fittings by NORMA

- Ideal for high-pressure applications
- Perfect water tightness
- Fast and easy connection
- Locking nut for clinching system
- High UV and temperature resistance
- Safe and durable

Technical Information

Applications

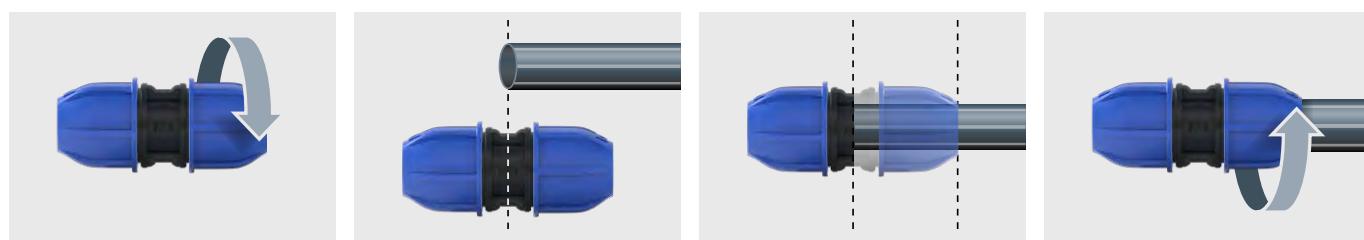

Ideally suited for more demanding irrigation applications like public parks, sports fields, golf courses and high-end agriculture-based irrigation. It is also suited for industrial applications.

Material

Body	Polypropylene	Working pressure: 16 bar (PN 16) up to Ø 63 mm and 12.5 bar for Ø larger than 63 mm.
O-Ring	NBR	
Holder	Polypropylene	
Clinching Ring	POM (Acetal)	
Locking Nut	Polypropylene	

Installation Tips

01 Unscrew the nut one or two turns or to the last thread.

02 Cut the pipe and deburr if necessary. Mark the insertion depth.

03 Push the pipe to the mark or the stop-end.

04 Screw the nut on tight. The nut can be tightened manually or using a hook tool.

Under Pressure Tapping Ferrule with Cutter

01.

Tapping Ferrule is the easiest way to tap water pipes and get a pressurized water exit.

Cutter included to self-cut the pipe

Cap for security of the pressurized exit

Connect with a clamp saddle to create a water outlet

Choose between threaded and compression joint outlets

NEW RANGE

Speed up the process of repairing a broken pipe!

NORMA

- Ideal connection for repairing and taping into a PE pipe
- Dual O-rings are used to ensure leakage-free connections
- No additional components required for fixing the pipe
- Extensible telescopic function for easy and fast repair
- UV stabilized to perform even in harsh sunny conditions
- Innovative solution

Technical Information

01.

Applications			
For repairing broken pipe sections while reducing the physical labour involved.			
Material			
Nut	Polyethylene	Outer Body	Polyethylene
Clinching Ring	POM (Acetal)	Telescopic Nut	Polyethylene
Holder	Polyethylene	Insert O-Ring	Nitrile Butadiene Rubber (NBR)
O-Ring	Nitrile Butadiene Rubber (NBR)	Inner Body	Polyethylene

Installation Tips

01 Cut the pipe as per the cut template.
Unscrew all nuts to the last thread.
Pull the O-rings into the relaxed position.

02 Slide the fitting over the pipe to the maximum insertion depth and tighten the nut.

03 Slide the outer body of the fitting to the maximum insertion depth until it extends over the pipe and tighten the blue nut.
Tighten the black nut.

Installation Measures Information

NORMA PN 10

**Cost-competitive high-quality compression fittings
for your needs**

- No special tooling required
- Perfect water tightness
- Easy connection
- Locking nut for clinching system
- High UV and temperature resistance
- Safe and durable

Technical Information

Applications

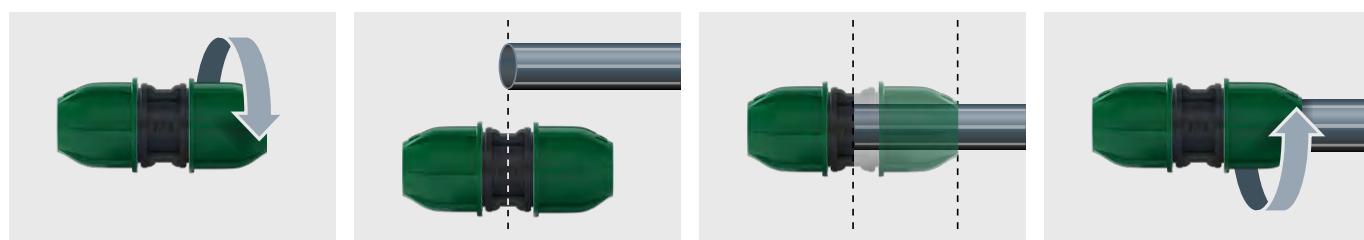

Ideally suited for residential landscape irrigation and for agriculture-based irrigation.

Material

Body	Polypropylene	Working pressure: 10 bar (PN 10).
O-Ring	NBR	
Holder	Polypropylene	
Clinching Ring	POM (Acetal)	
Locking Nut	Polypropylene	

Installation Tips

01 Unscrew the nut one or two turns or to the last thread.

02 Cut the pipe and deburr if necessary. Mark the insertion depth.

03 Push the pipe to the mark or the stop-end.

04 Screw the nut on tight. The nut can be tightened manually or using a hook tool.

01.

NORMA Ball Valve

Exceeding performance, even in harsh conditions

- Innovative design of the ball valve allows full true passage in open condition
- Higher corrosion and frost resistance
- More efficient water discharge due to lower wall thickness of the nylon ball valve
- Removable handle prevents unauthorised manipulation of the valve
- Superior mechanical resistance due to nylon material
- Maximum operating temperature of 60° C

Technical Information

Applications

Perfect for all irrigation applications, especially for higher demanding installations like sports fields, large public parks, golf courses, large agricultural sites, etc. Can also be used in industrial applications.

Material

Working Pressure: 16 bar (PN16)

- Handle: Nylon
- Stem: POM (Acetal)
- Body: Nylon
- End connector: Nylon
- O-rings: NBR
- Seat: HDPE
- Ball: CPVC
- Male threaded connector (FxM): Nylon

High quality glass reinforced nylon construction

Guyco is a NORMA Group brand

Guideline for removing the handle

01 Turn the handle slightly clockwise

02 Put fingers below handle and pull it up at the same time, with thumb pushing down on valve body

NORMA Nylon Ball Valves

NORMA Nylon Threaded Fittings

Perfect complement to the NORMA Nylon Ball Valves, same level of quality and strength.

Extended range of durable high quality threaded fittings

The precision heavy-duty tapered threads deliver a strong sealing effect

Manufactured from glass fibre reinforced nylon

Suitable for all irrigation applications, especially for use in harsh conditions

Guyco is a NORMA Group brand.

NORMACLAMP® TORRO

01.

The industry's gold standard for more than 50 years

NORMA

Multi-range hose clamp

No chromium (VI) used for coating purposes

Clamping ranges in acc. with DIN 3017:
8 – 16 mm to 140 – 160 mm

Larger diameters available on request

Technical Information

Material

TORRO is well suited to applications involving poly and braided tubing that require a complete seal, e.g. for:

- Joining cooling water lines
- Depressurized and pressurized fuel lines and ventilation systems
- Joining lines in sanitary applications
- Joining lines in machine building applications
- Lines in the household appliance industry
- Oil lines

Material

Professional Drip Irrigation

Introducing NORMA and NDS® Professional Irrigation, a series of efficient drip irrigation products that offers complete system-oriented watering solutions for the

green industry. The product offering includes driplines, drip fittings, drip emitters, and accessories.

Categories & Key Products

Driplines and Other Drip Tubing

NEW RANGE

Highly efficient complete solutions for landscape irrigation

- Self-flushing pressure compensating emitter
- Anti-siphon mechanism prevents suction of soil into the emitter
- Chemical-free root intrusion protection
- Durable under harsh conditions

02.

[Page 56](#)

Drip Fittings

Secure, leak-free connections

- Resistance to UV radiation
- Easy and fast installation
- Fittings for both 16 mm and 17 mm tubing
- Large variety of fittings for drip irrigation

[Page 62](#)

Drip Emitters

Access to wide range of high-performance emitters

- Superior flow uniformity
- Self-flushing emitters minimise clogging
- Tool-free installation
- Pressure compensating and non pressure compensating options

[Page 68](#)

Drip Accessories

Diversified accessories that complete the drip solutions

- Easy to handle
- Superior performance
- Compatible with all drip systems
- Complementary sprinkler connection accessories

[Page 76](#)

NORMA PC Dripline

High performance dripline for landscape applications

- PC – Pressure Compensating: Even distribution of water regardless of pressure fluctuations
- Flexible pipe for easy and fast installation in all applications
- Pressure working range 1.0 – 4.0 bar
- Anti cracking system, for long lasting installations
- Durable under harsh field conditions and chemicals resistant
- Minimal clogging due to self-flushing emitter design

Technical Information

Applications

Perfect solution for all landscape drip applications, specially recommended for demanding installations, like, public green areas, commercial applications and high-end residential irrigation systems

Material

Sustainable material: 100% recyclable polyethylene

NORMA PC Dripline NEW RANGE

NORMA PC Dripline 16 mm (Pressure Compensating)	Flow: 2.1 lph	Emmiters Spacing: 33 cm	
--	---------------	-------------------------	---

Part number	Color	Ø DN (mm)	Thickness (mm)	Coil size (m)
0894 2410 003	Brown	16	1.15	25 (wrapped)
0894 2410 001	Brown	16	1.15	50 (wrapped)
0894 2410 002	Brown	16	1.15	100 (wrapped)
0894 2410 004	Brown	16	1.15	400 (wrapped)
0894 2410 021	Dark Brown	16	1.15	100 (wrapped)

NOTE: We can quote different flow rates and different emitters spacing

02.

NORMA PC Dripline 17 mm (Pressure Compensating)	Flow: 2.1 lph	Emmiters Spacing: 33 cm	
--	---------------	-------------------------	---

Part number	Color	Ø DN (mm)	Thickness (mm)	Coil size (m)
0894 2410 091	Brown	17	1.25	50 (wrapped)
0894 2410 092	Brown	17	1.25	100 (wrapped)

NORMA CV Dripline

NORMA CV dripline combines the best of NORMA PC Dripline with a Check Valve (CV), saving water by reducing water wastage

- Anti-siphon mechanism prevents suction of debris into the emitter
- Ideal for slopes: each emitter has a check valve that closes at 0.14 bar, holding back 1.4 m of elevation
- Allows for longer run lengths: working pressure starting at 0.5 bar
- Dripline remains full of water between irrigation intervals providing immediate and uniform irrigation at each irrigation cycle and avoiding low head runoff

NORMA CV Dripline

Norma CV Dripline 16 mm (Pressure Compensating with Check Valve)	Flow: 2.1 lph	Emmiters Spacing: 33 cm		
Part number	Color	Ø DN (mm)	Thickness (mm)	Coil size (m)
0894 2410 011	Brown	16	1.15	50 (wrapped)
0894 2410 012	Brown	16	1.15	100 (wrapped)

NOTE: We can quote different flow rates and different emitters spacing

Norma CV Dripline 17 mm (Pressure Compensating with Check Valve)	Flow: 2.1 lph	Emmiters Spacing: 33 cm		
Part number	Color	Ø DN (mm)	Thickness (mm)	Coil size (m)
0894 2410 081	Brown	17	1.25	50 (wrapped)
0894 2410 082	Brown	17	1.25	100 (wrapped)

NORMA Distribution Pipes

Wide range of distribution pipes for all drip applications

- Flexible pipes for easy and fast installation
- Same pipe quality as driplines, including anti cracking system
- Dripline complement to dripline pipes

NORMA Distribution Pipes

Norma Drip Distribution Tubing 16 mm (Blank Tubing)

Part number	Color	Ø DN (mm)	Thickness (mm)	Coil size (m)

02.

Pressure indicated for the entrance of the branch. These maximum length of branch tables are a tool to help the hydraulic calculation of facilities; they constitute a particular case for the data that have been defined and do not replace the professional installation calculation.

Smart-Loc™

02.

High performance solution, easy and fast to install

- Secure leak-free connections
- Removable and re-usable
- Reliable under the most demanding conditions
- Works with all common pipes of 16–18 mm diameter
- Ideal for tubing repairs
- All fittings are complete functional units and require no additional adaptors

AccuFlow™ PC

The most accurate pressure compensating emitter

- Superior flow uniformity
- Durable self-flushing emitter
- Working pressure compensation
Pressure: 1.0 to 3.4 bar
- UV resistant
- Easy to hide in the landscape
- Clearly marked and color-coded for
easy identification

03 Valve Boxes

NORMA and NDS valve boxes span a wide variety of sizes from 6" round boxes to 17" x 30" rectangular boxes. They are available with black, green, purple, brown and sand covers

with option of irrigation control valve or reclaimed water designations. All valve boxes and lids contain UV inhibitors for sustained durability and performance in direct sunlight.

Categories & Key Products

NDS® Pro-Spec™ Series

Next Generation Commercial Grade

- Superior performance and durability
- Specification grade for professional application
- Option of Irrigation Control Valve (ICV) or Reclaimed Water labelled covers.
- Available in various color combinations
- UV resistance

[Page 82](#)

NORMA Valve Boxes NEW RANGE

Residential and Light Commercial Grade

- Lid shovel access slot for easy removal
- Knockouts for easy pipe access slots
- Locking system
- UV resistance

NDS® Standard Series

Residential / Commercial Grade

- Option of Irrigation Control Valve (ICV) or Reclaimed Water labelled covers.
- Twist-on cover ensures easy removal on 6" round boxes
- Available in various color combinations
- UV resistance

[Page 90](#)

NDS Pro-Spec™ Series

03.

Superior strength with unique corrugated sidewalls

- Corrugated sidewalls provide higher strength
- Integrated nut for bolt-down capability
- Specification grade valve boxes for commercial applications
- High UV resistance prevents discoloration and cracking
- Reinforced covers for heavier loads
- Overlapping covers prevent dirt and grass from settling in between body and cover

NDS Standard Series

High-quality valve boxes designed for longevity

- Reinforced covers for heavy loads
- Integrated nut for bolt down capacity
- One piece molded polyolefins (polyethylene and polypropylene)
- UV resistance
- For use in residential and commercial applications
- Overlapping covers prevent dirt and grass from setting in between body and cover

Landscape Solutions

NDS Permeable Pavers provide an alternative solution to traditional paving methods by creating a strong grass or gravel surface that can support heavy loads. They maintain permeable surface areas, eliminating or

reducing water runoff. Tree sustainability solutions protect sidewalks, driveways, and walls of buildings from damage arising from tree roots.

Categories & Key Products

Permeable Pavers

Cost-effective alternative solution to traditional paving methods

- Easy installation due to roll design
- High compressive strength
- Recyclable material
- Reduced maintenance

[Page 98](#)

Tree Sustainability Solutions

Protects homeowners from high cost of repairs

- Easy installation
- Variety of solutions
- Recyclable material
- UV protection

[Page 102](#)

EZ Roll™ Grass Paver and Gravel Paver

Cut your installation time to a minimum by simply rolling out the product!

- Easy installation – EZ Roll™ products come in large rolls that are easy to lay and clip together
- High performance – UV inhibitors in the polymer prevent breakdown in paver strength
- High strength – heavy, above average, load capacity
- Environmentally friendly – EZ Roll™ prevents soil compaction that inhibits healthy root growth
- Enhanced aesthetics – Pavers blend into the environment, minimizing water runoff and soil erosion
- Reduced maintenance – less expensive to maintain over time

Technical Information

EZ Roll™ Pavers

Applications

A turf-reinforcing, load-transferring paving system designed for:

- Golf cart paths
- Garage entrances
- Overflow parking areas
- Roadway shoulders
- Emergency vehicle access roads

Material

100% recycled HDPE plastic (50% pre-consumer, 50% post-consumer). HDPE is rugged, flexible and ideally suited for outdoor exposure and longevity.

Compressive strength

- Grass Pavers have a compressive strength of 24 kg / cm² in an empty condition and more than 181 kg / cm² when filled with native topsoil.
- Gravel Pavers have a compressive strength of 24 kg / cm² in an empty condition and more than 226 kg / cm² when filled.

Note: Different lengths – please refer to the tables

Installation Guideline

Roll it out

Manufactured in pre-assembled rolls for fast and easy installation on prepared base.

Clip it together

Lateral snap-lock system allows rolls to be connected without special tools.

Fill it

- Top with sod or seed per local standards.
- Use clean gravel that is uniform in size, 1 cm angular stones work best.

Tree Sustainability Solutions

Tree sustainability solutions include root barrier systems which help in directing the roots from shrubs and trees to grow downwards. This dramatically decreases the roots'

potential to damage sidewalks, driveways, building foundations, etc.

Modular EP Series Root Barrier Panels

- Panels with a 10 mm wide "T" top edge and an external ground anchoring base flange 3 mm width
- Each barrier is a minimum of 2.3 mm thick and is made of up to 50% post-consumer High Impact Polypropylene (HIPP) with UV inhibitors to ensure longevity
- Barrier Panels with 13 mm raised vertical ribs running perpendicular to the panel and that are 15 mm on center
- Factory installed independent joiner strips

Root Barrier Roll

- Easy and fast to install rolls
- Manufactured from up to 50% recycled HDPE with UV inhibitors and a thickness of 1–1.5 mm
- Vertically integrated and flared moulded 90° root deflecting ribs that protrude 13 mm from the wall and are placed 15–20 cm apart
- Root impervious moulded end that provides easy assembly using staples or a sealant designed to bind to HDPE (dual sided solvent based tape)
